

# Statement of Work

## Group 6\_CNA330; Basketball Database 11/19/2020

Development outline: Design, develop, and deploy one (1) Database project involving NBA/League sports/Basketball in some way and one (1) Group Presentation. This project will take sports data from a website (such as Basketball reference API) putting it into a database and, querying the database to produce statistics, and using the statistics to make informed about game results.

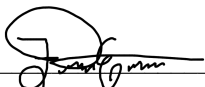

Execution: The project will follow an iterative design process, with final delivery set of the system December 10, 2020. The goal is to create a prototype of a NBA league database with statistics. A group project presentation will be delivered along with any other requested documentation. On December 10, 2020, the project will be complete.

## Timeline

- 11/24/2020 Acceptance of terms and initiation of project
- 11/26/2020 Holiday, due Thanksgiving
- 11/30/2020 Code done and bug testing
- 12/10/2020 Completion of project.
